PERSONAL PROFILE

I'm a professional with more than 3 years of experience in AI LLM improvements and 1 year of experience in QA processes focused on video game publishing and localization of EN_US to ES_LATAM languages. I'm passionate about technology, specially in the feedback and bug reporting areas as QA is fun to work with. I'm a professional with strong attention to detail who excel at meeting tight deadlines, SLA's, working with ambiguity and my forte is self-directed work, as well as collaborative environments where teamwork and good communication are key. I'm impulsive on finding improvements areas.

WORK EXPERIENCE

ML Associate II (Formerly Alexa Data Associate)

Amazon Latam | Nov 2019 - October 2022 | June 2025 - present

- AI Data Annotation focused on Transcriptions which trains AI Languange Modules by carefully categorizing critical data using internal Convention Guidelines while following internal safety and privacy standards.
- AI Content Auditor focused on Quality checks for AI Responses to ensure internal standards are met and teach the AI Language Module how to asses better answers for the user.

Game Tester QA

HCLTechnologies (Xbox) | Jul 2023 - Aug 2024

- Video game QA testing using diverse tools involving writing and submission of test cases through Microsoft Xbox Certifications system, teamwork and team communication, detailed bug writing, bug audits, time management, attention to detail and wide range of knowledge about the video game industry and video game development process.

LQA Game Tester

Lionbridge Games | Aug 2024 - April 2025

- Video game Localization QA testing using diverse tools like Jira and Test rail, involving writing and submission of test cases, detailed bug writing, bug audits with strong attention to detail and wide range of knowledge about the video game industry and video game development process, most importantly Latin American Spanish Localization processes.
